Software Engineering student (B.Sc., in progress) currently completing an industrial placement in applied machine learning at an AI Hub in Kano, building a RAG-based university assistant and documenting the process publicly.

EDUCATION

B.Sc. Software Engineering

Al-Istiqama University Sumaila (AUSU) — In progress

CGPA: 4.63 / 5.00 across 72 credit units

EXPERIENCE

SIWES Trainee (Industrial Attachment)

AI Hub, Kano — Current

- Self-directed placement in Python and applied machine learning, in place of standard coursework, Monday through Thursday.
- Maintains a public logbook covering Python fundamentals through object-oriented programming, file handling, Pandas, and AWS AI/ML fundamentals.
- Building AAIS, a RAG-based university assistant, as the placement's primary project.

PROJECTS

AAIS — Intelligent University Assistant System (In Development)

RAG-based assistant answering student questions from a structured AUSU knowledge base. Flask, Claude API.

Football Arena Booking System (MVP In Progress)

Slot-booking and payment platform for a real venue in Kano, with an explicit booking state machine. Flask, SQLAlchemy, Paystack.

Result Management System (Shipped)

Result computation and PDF report-card generation for a secondary school, later adapted for university-level credit-weighted results. Flask, Pandas, ReportLab.

Islamiyya School Management System (Validated Concept)

Scope validated through a stakeholder interview; planned build around fee collection, attendance, and progress tracking. Flask, SQLAlchemy.

SKILLS

Languages: Python, JavaScript, Java (learning), HTML, CSS

Frameworks & Libraries: Flask, SQLAlchemy, Pandas, ReportLab

Tools: Git, GitHub, VS Code

Spoken Languages: English, Hausa, Arabic

CERTIFICATIONS

AI/ML Fundamentals — Amazon Web Services (2025)

100 Days of Python, Angela Yu — Udemy (in progress)
