

SADIQ USMAN NAGODA

Software Engineering Student | Aspiring Software Developer | AI Enthusiast
Kano, Nigeria | github.com/Sadiq-Nagoda | linkedin.com/in/sadiq-nagoda-076225383 | medium.com/sadiq-usman

PROFESSIONAL SUMMARY

Disciplined and analytically driven Software Engineering student (Level 400) completing an industrial attachment at AI Hub, Kano, with a focus on AI and machine learning applications. Proficient in Python, HTML/CSS, and web development fundamentals, with hands-on experience building command-line tools and web applications. Currently deepening expertise through Angela Yu's 100 Days of Python and AWS AI/ML Fundamentals. Trilingual communicator (English, Hausa, Arabic) with strong self-directed learning habits, a structured approach to problem-solving, and long-term ambition to build a technology company. Actively documenting technical growth in public via LinkedIn and Medium.

EDUCATION

B.Sc. Software Engineering

[Al-Istiqama University]

Currently at Level 400 | Expected Graduation: [400]

Kano, Nigeria

INDUSTRIAL TRAINING (SIWES)

AI/ML Industrial Trainee — AI Hub

Kano, Nigeria | 2025 – Present

- Completed 7+ weeks of structured training covering Python fundamentals, OOP principles, and AWS AI/ML concepts including Generative AI.
- Maintained a daily SIWES logbook documenting technical progress across Python, web development, and cloud AI fundamentals.
- Studied and applied core ML concepts including supervised/unsupervised learning, model evaluation, and generative AI fundamentals.
- Practiced Git-based version control with daily commits to a public GitHub repository (SIWES-AI-JOURNEY), reinforcing professional development workflows.
- Built productivity habits around structured learning resources official docs, Angela Yu's Python course, and AWS training materials.

PROJECTS

Maracana Football Arena Booking System | Flask · SQLAlchemy · Paystack · HTML/CSS

MVP In Progress

- Engineering a web-based football arena reservation platform targeting the Kano market, handling slot booking, scheduling, and online payments via Paystack integration.
- Implemented relational database models with SQLAlchemy and designed RESTful routes in Flask to manage arena availability and user bookings.

Islamiyya School Management System | Flask · SQLAlchemy · Python

Planned Build

- Identified and validated a real operational gap in local Islamic schools — chaotic fee collection, absent attendance tracking, no Quran progress structure — through direct stakeholder interviews.
- Designing a full-stack management system to digitize enrollment, attendance, fee collection, and academic progress for Islamiyya schools across Kano.

Python Fundamentals Projects | Python · Turtle · CLI

Angela Yu — 100 Days of Python

- Built a command-line Budget Tracker enabling income/expense logging, balance calculation, and financial record organization using core Python data structures and file handling.
- Developed a terminal-based Task Manager supporting full CRUD operations via loops, functions, lists, and conditional logic.
- Constructed the classic Snake Game using Python's Turtle module, applying OOP principles including class design, state management, and collision detection.
- Recreated the Hirst Spot Painting with programmatic color extraction and Turtle graphics — demonstrating algorithmic thinking and structured iteration.

AAIS — AI University Assistant (Frontend Prototype) | HTML · CSS · JS

Final Year Project (Planned)

- Designed and built a functional frontend prototype for an AI-powered university assistant tailored to the Nigerian higher education context.
- Planned for backend integration with NLP capabilities; targeted as capstone final year project.

TECHNICAL SKILLS

▸ Python	▸ HTML5 & CSS3	▸ JavaScript (Learning)
▸ Flask	▸ SQLAlchemy	▸ Git & GitHub
▸ REST APIs	▸ OOP Principles	▸ Data Structures & Algorithms
▸ AWS AI/ML Fundamentals	▸ Generative AI (Fundamentals)	▸ Command-Line Tools
▸ Turtle / Standard Library	▸ VS Code	▸ Paystack Integration

CERTIFICATIONS & COURSES

AWS AI/ML Fundamentals	Amazon Web Services 2025
100 Days of Python — Angela Yu	Udemy In Progress (2025)
Machine learning Maestry — Microsoft	
	[DevTown <u>2027r</u>]

LANGUAGES & SOFT SKILLS

Languages Spoken	Soft Skills
English (Fluent) · Hausa (Native) · Arabic (Proficient)	Logical Thinking · Discipline · Independent Learning · Adaptability · Time Management · Attention to Detail
